

ENVIRONMENTAL POLICY

Our Commitment

Wallace Investments is a New Zealand owned conventional stevedoring company servicing customers' throughout New Zealand and the Pacific. We are committed to care for the environment. We believe it is important that we do what is right in protecting the environment in which our people and our wider communities live and work in order to maintain its quality for the benefit of future generations.

Our Actions

We meet our environmental commitments through the following objectives:

- Valuing protection of the environment as equally important as other business activities.
- Ensuring that the activities over which we have control are carried out in a way that avoids or minimises any actual or potential adverse effects on the environment.
- Continually improving our environmental performance through the development and regular review of objectives, procedures, standards and work practices.
- Training and educating our employees to ensure they have the skills and knowledge to correctly manage environmental issues.
- Undertaking our operations in a way that prioritises the efficient use of natural resources.
- Managing our waste streams in order to minimise our waste to landfill.
- Considering the environmental risks and hazards as well as the sustainability aspects of business decisions.
- Complying with ISO 14001, relevant legislation, regulations, resource consents, management plans, best practice guidance and safe operating procedures.
- Consulting and coordinating with others we work with to effectively and efficiently manage shared duties around environmental protection.
- Clearly communicating all hazards and impacts with potential to adversely affect the environment.
- Educating employees and others we work with on their responsibilities and holding them accountable for any action or inaction that may result in adverse effects on the environment.
- Requiring our leaders to show competence in environmental management and facilitate compliance with our procedures.
- Ensuring all environmental incidents are accurately reported and thoroughly investigated so that we can take action to avoid reoccurrence.
